

Comparative Air Sampling Exercise in Hungary

On 1st September 2022, an air sampling comparison exercise took place at the Semmelweis University Laboratory in Budapest. During the exercise, air sampling devices used in Bio sampling were compared, based on their performance parameters.

The event, organized by Zug Medical Systems in the framework of Project HOLOZCAN Work Package 3, was attended by experts from the Hungarian Counter-Terrorism Unit, as well as by representatives of IDEAS Science and DataSense Lab companies.
