

**LILLE FRANCE**  
May 3<sup>rd</sup> - 6<sup>th</sup> 2022

Theoretical limits and perspectives of the digital holographic technology in bio-detection related onfield decision making

The Lille CBRNe Conference focuses on 4 pillars: Detection/Identification, Protection/Decontamination, Medical Countermeasures and Risks&Crisis Management. Project HoloZcan builds future Bio-detection devices, based on close interaction with End-Users. We are attending this event to identify potential synergies and contacts. Please find here our event [Poster](#) and [Abstract](#).

To contact us please message [@HoloZcan](#) or [info@holozcan.com](mailto:info@holozcan.com)

Thank you.
